(54) Title: FLOWER ARRANGEMENT HOLDER HAVING HYDROPONIC FUNCTION

(57) Abstract: Disclosed herein is a flower arrangement holder having a hydroponic function. The flower arrangement holder according to the present invention includes a storage tank (6) containing liquid therein, an absorbent body seat (4) which is formed in a central portion of the storage tank (6) and receives an absorbent body (3) therein, and a liquid supply hole (7) which is formed through the storage tank (6) to supply liquid into the storage tank (6). The flower arrangement holder further includes a flange (1) which is provided around an outside edge of an upper wall of the storage tank (6), and a support (9) which is provided under the bottom of the storage tank (6). The flower arrangement holder of the present invention keeps flowers from withering and helps them maintain their freshness over a long period and, as well, is able to be used for hydroponic culture.
